

1

Küçük F, Çiftçi Y, Güçlü SS, Mutlu AG, Turan D  
Taxonomic review of the *Chondrostoma* (Teleostei, Leuciscidae) species from inland waters of Turkey: an integrative approach

15

Özbek M, Aksu İ, Baytaşoğlu H  
A new freshwater amphipod (Amphipoda, Gammaridae), *Gammarus tumaf* sp. nov. from the Gökğöl Cave, Türkiye

29

Konopleva ES, Bolotov IN, Vikhrev IV, Inkhavilay K, Gofarov MYu, Kondakov AV, Tomilova AA, Chapurina YE, Van Do T, Pfeiffer JM, Lopes-Lima M, Bogan AE  
A freshwater mussel species reflects a Miocene stream capture between the Mekong Basin and East Asian rivers

45

Siyam M, Dunlop JA, Kovařík F, Mohammad A  
Additions to the distribution of Sudanese scorpions

55

Wildish DJ, McDonald JH  
Possible causes of amphiatlantic distribution of *Orchestia gammarellus* (Pallas, 1776) (Crustacea, Amphipoda, Talitridae) in the North Atlantic: a review

63

Tibirića Y, Strömvoll J, Cervera JL  
Can you find me? A new sponge-like nudibranch from the genus *Jorunna* Bergh, 1876 (Mollusca, Gastropoda, Discodorididae)

77

Makino T, Nakano T, Okamoto T, Hikida T  
Taxonomic revision and re-description of *Ateuchosaurus peloppleurus* (Hallowell, 1861) (Reptilia, Squamata, Scincidae) with resurrection of *A. okinavensis* (Thompson, 1912)

93

Imentai A, Bláha M, Veselý L, Kříšťan J, Polícar T  
A contribution on the morphometrics of the thick-clawed crayfish *Pontastacus pachypus* (Rathke, 1837) (Decapoda, Astacoidea, Astacidae)

101

Tolley KA, Telford NS, Makhubo BG, Power RJ, Alexander GJ  
Filling the gap: Noteworthy herpetological discoveries in North West Province, South Africa

117

Martínez L, Gilardoni C, Medina C, Lauthier JJ, Cremonese F, Etchegoin J  
First molecular identification of the trematode *Maritrema bonaerense* Etchegoin & Martorelli, 1997 (Plagiorchiida, Microphallidae) from its intermediate hosts, the gastropod *Heleobia australis* (d'Orbigny, 1835) (Littorinimorpha, Cochliopidae) and the crab *Neohelice granulata* (Dana, 1851) (Decapoda, Varunidae) in Argentina

123

Sudhin PP, Sen S, Caleb JTD  
Two new *Stenaelurillus* species (Araneae, Salticidae, Aelurillina) from Western Ghats, India

135

Damadi E, Yazdani Moghaddam F, Ghanbarifardi M  
Species delimitation, molecular phylogeny and historical biogeography of the sweetlips fish (Perciformes, Haemulidae)

149

Jimi N, Fujita T, Woo SP  
Four new species of coral- and rock-boring polychaetes *Daylithos* (Annelida, Flabelligeridae) from the Pacific Ocean

161

Costa WJEM, Mattos JLO, Amorim PF, Mesquita BO, Katz AM  
Chromatic polymorphism in *Trichomycterus albinotatus* (Siluriformes, Trichomycteridae), a mountain catfish from south-eastern Brazil and the role of colouration characters in trichomycterine taxonomy

173

Günther R, Dahl C, Richards SJ  
Another giant species of the microhylid frog genus *Cophixalus* Boettger, 1892 from the mountains of Papua New Guinea and first records of procoracoids in the genus

185

Canoglu H, Aksu I, Turan D, Bektas Y  
DNA barcoding of the genus *Alburnoides* Jeitteles, 1861 (Actinopterygii, Cyprinidae) from Anatolia, Turkey

195

Boonmachai T, Bergey EA, Nantarat N  
First record and description of three new species in the land snail genus *Diplommatina* Benson, 1849 (Caenogastropoda, Diplommatinidae) from Satun Province, Thailand

209

Caleb JTD, Parag A, Datta-Roy A  
A new species of the genus *Siler* Simon, 1889 (Araneae, Salticidae, Chrysillini) from India

217

Song SJ, Lee S-k, Kim M, George KH, Khim JS  
Phylogenetic revision of *Echinolaophonte* Nicholls (Copepoda, Harpacticoida, Laophontidae T. Scott) including the establishment of two new genera and two new species

253

Kodeeswaran P, Kantharajan G, Mohapatra A, Ajith Kumar TT, Kumar Sarkar U  
A new short brown unpatterned moray eel (Anguilliformes, Muraenidae) from the southeast coast of India, Bay of Bengal

261

Jiao Y, Wang M, Guo Y, Zhang J  
A new deep-sea species of *Elliptiolucina* Cosel & Bouchet, 2008 (Bivalvia, Lucinida, Lucinidae) from cold seep of the South China Sea

273

Villarreal O, Chamé-Vázquez D  
First record of the false violin spider of the family Drymusidae (Araneae, Synspermiata, Scytodoidea) from Venezuela, with the description of a new species

281

Santos FJM  
Taxonomic notes on the head squamation of the genus *Liotyphlops* Peters, 1881 (Serpentes, Anomalepididae)

## A Bulletin of Zoology since 1898

### Instructions for authors

#### Scope

**Zoosystematics and Evolution** is an international, peer-reviewed life science journal devoted to the diversity, systematics and evolution of all animal groups, except for insects. It publishes original research and review articles at all taxonomic levels. Its scope encompasses primary information from collection-related research, taxonomic descriptions and discoveries, revisions, annotated type catalogues, relevant aspects of the history of science, and contributions on new methods and principles of taxonomy and systematics. Articles whose main topic is ecology, functional anatomy, physiology, or ethology are only acceptable when of clear systematic or evolutionary relevance and perspective. Studies on insects should be submitted to the sister journal of ZSE, Deutsche Entomologische Zeitschrift (DEZ).

#### Authors and submission

- Conflicts of interest: Authors must disclose relevant competing interests, both financial and personal.
- Ownership: Authors must declare that the submitted work is their own and that copyright has not been breached in seeking its publication.
- Originality: Authors must declare that the submitted work has not previously been published, and is not being considered for publication elsewhere.

#### Language and style

- The language of publication is English. There is no general limitation of the length of manuscripts, but please contact the editor before submitting papers exceeding 30 printed pages (approximately 60 manuscript pages including figures).
- Manuscripts should be written in a clear, straightforward style and must not have been published or submitted elsewhere.
- The text should be 12 pt, double-spaced, one-sided, left justified and with a margin of at least 3 cm.
- Use a standard typeface, e.g. Times New Roman as little formatted as possible (without tabulators, several blank spaces, etc.). Avoid footnotes.
- Divide the text into sections using headlines and subheadlines. Do not number the headlines. Inline headers should be set in italics and followed by a full stop.
- The names of genera and species must be in italics.
- Taxonomic descriptions must comply with the rules of the 4th edition of the ICZN (see <http://www.iczn.org/>).
- Enter the page number on every page.
- Submit figures with a minimum resolution of 300 dpi.
- The preferred file formats are PSD (Photoshop) and TIFF for colour and grayscale illustrations, and EPS for vector graphics.
- JPG files are only accepted in high resolution.

#### General manuscript structure

If appropriate, the manuscript should be structured using headlines and sub-headlines, but without numbering, according to the following sections:

- Title page
- Abstract
- Introduction
- Materials and Methods
- Results
- Discussion
- Acknowledgements
- References
- Tables with captions
- Figure captions

#### The publication process

##### Peer reviewing

Manuscripts are subject to peer review. All manuscripts submitted will be reviewed by at least two experts. Authors are welcome to make suggestions for competent reviewers.

##### Proofs

Prior to publication of your manuscript you will receive proofs in PDF format. Please correct and return the proofs within two weeks to the editorial office.

We recommend using the standard proofreading marks or – in the case of a few corrections – using page and line numbers.

Do not change the contents of your article. Corrections extending beyond production errors will be carried out at the expense of the author.

The editorial office reserves the right to publish your article with only the editor's corrections, if your corrections do not reach us in time.

##### Publishing

The print and the online versions of your paper are published simultaneously. It is accessible in open access at Pensoft: <http://zse.pensoft.net>

#### COPE Membership

This journal endorses the COPE (Committee on Publication Ethics) guidelines and will pursue cases of suspected research and publication misconduct (e.g. falsification, unethical experimentation, plagiarism, inappropriate image manipulation, redundant publication). For further information about COPE, please see the website for COPE at <http://www.publicationethics.org.uk>
