Evolution**

# Zoosystematics and Evolution

## A Bulletin of Zoology since 1898

## Instructions for authors

### Scope

**Zoosystematics and Evolution** is an international, peer-reviewed life science journal devoted to the diversity, systematics and evolution of all animal groups, except for insects. It publishes original research and review articles at all taxonomic levels. Its scope encompasses primary information from collection-related research, taxonomic descriptions and discoveries, revisions, annotated type catalogues, relevant aspects of the history of science, and contributions on new methods and principles of taxonomy and systematics. Articles whose main topic is ecology, functional anatomy, physiology, or ethology are only acceptable when of clear systematic or evolutionary relevance and perspective. Studies on insects should be submitted to the sister journal of ZSE, Deutsche Entomologische Zeitschrift (DEZ).

### Authors and submission

- Conflicts of interest: Authors must disclose relevant compet- ing interests, both financial and personal.
- Ownership: Authors must declare that the submitted work is their own and that copyright has not been breached in seeking its publication.
- Originality: Authors must declare that the submitted work has not previously been published, and is not being consid- ered for publication elsewhere.

### Language and style

- The language of publication is English. There is no general limitation of the length of manuscripts, but please contact the editor before submitting papers exceeding 30 printed pages (approximately 60 manuscript pages including figures).
- Manuscripts should be written in a clear, straightforward style and must not have been published or submitted elsewhere.
- The text should be 12 pt, double-spaced, one-sided, left justified and with a margin of at least 3 cm.
- Use a standard typeface, e.g. Times New Roman as little format- ted as possible (without tabulators, several blank spaces, etc.). Avoid footnotes.
- Divide the text into sections using headlines and subheadlines. Do not number the headlines. Inline headers should be set in italics and followed by a full stop.
- The names of genera and species must be in italics.
- Taxonomic descriptions must comply with the rules of the 4th edition of the ICZN (see http://www.iczn.org/).
- Enter the page number on every page.
- Submit figures with a minimum resolution of 300 dpi.
- The preferred file formats are PSD (Photoshop) and TIFF for colour and grayscale illustrations, and EPS for vector graphics.
- JPG files are only accepted in high resolution.

#### General manuscript structure

If appropriate, the manuscript should be structured using head- lines and sub-headlines, but without numbering, according to the following sections:

- Title page
- Abstract
- Introduction
- Materials and Methods
- Results
- Discussion
- Acknowledgements
- References
- Tables with captions
- Figure captions

### The publication process

#### Peer reviewing

Manuscripts are subject to peer review. All manuscripts submitted will be reviewed by at least two experts. Authors are welcome to make suggestions for competent reviewers.

#### Proofs

Prior to publication of your manuscript you will receive proofs in PDF format. Please correct and return the proofs within two weeks to the editorial office.

We recommend using the standard proofreading marks or – in the case of a few corrections – using page and line numbers.

Do not change the contents of your article. Corrections extending beyond production errors will be carried out at the expense of the author.

The editorial office reserves the right to publish your article with only the editor's corrections, if your corrections do not reach us in time.

#### Publishing

The print and the online versions of your paper are published simul- taneously. It is accessible in open access at Pensoft: http://zse.pensoft.net

### COPE Membership

This journal endorses the COPE (Committee on Publication Ethics) guidelines and will pursue cases of suspected research and pub- lication misconduct (e.g. falsification, unethical experimentation, plagiarism, inappropriate image manipulation, redundant publica- tion). For further informa- tion about COPE, please see the website for COPE at http://www.publicationethics.org.uk

#### 1085

*Terán GE, Méndez-López A, Benitez MF, Serra WS, Bogan S, Aguilera G* Re-description of *Xyliphius barbatus* (Siluriformes, Aspredinidae), with comments on osteology and distribution

#### 1099

*Ibarra-Núñez G, Marín L* First record of the genus *Falconina* (Araneae, Corinnidae) from Mexico, with a description of a new species and observations on its interactions with ants

#### 1107

*Sánchez-Nivicela JC, Székely D, Salagaje M. LA, Astudillo-Abad N, Culebras J, Ortiz EA, Székely P* One hundred years of solitude: The rediscovery of *Pristimantis ruidus* (Anura, Strabomantidae) in the southern Andes, Ecuador and its phylogenetic relationships

#### 1121

*Wang J, Zeng Z-C, Wei T-L, Lyu Z-T* Taxonomic determination of *Hypselotriton* populations distributed in eastern Guangdong, China (Caudata, Salamandridae), with description of a new species and a new subgenus

#### 1135

*Polyotha A, Sutcharit C, Panha S, Tongkerd P* Reassessment and phylogenetic position of the overlooked limacoid land snail *Trochomorpha sculpticarina* Martens, 1883 (Eupulmonata, Ariophantidae), with the description of a new genus

#### 1155

*Artaev ON, Bolotovskiy AA, Turbanov IS, Gandlin AA, Kutuzov AV, Levina MA, Melentev DA, Pozdeev IV, Borisov MYa, Levin BA* Forgotten for two centuries: redescription of *Phoxinus isetensis* (Georgi, 1775) (Cypriniformes, Leuciscidae) – the most widespread minnow in Europe

#### 1175

*Cantalapiedra-Navarrete C, Clavero-Camacho I, Criado-Navarro I, Salazar-García R, García-Velázquez A, Palomares-Rius JE, Castillo P, Archidona-Yuste A* Another new ring nematode, *Xenocriconemella andreae* sp. nov. (Nematoda, Criconematidae), from the Iberian Peninsula
